Junior Developer

KINETIXBD - House 52/A, Abdur Rahman Lane, Zigatola Dhanmondi , Dhaka .

- From April 2020 to September 2021

- I work there as a Laravel full-stack developer.
- Participated in every step of the product development process from ideation through development and improvement for features.
- I was responsible for crafting codes and testing them.

P O R T F O L I O

Tailoring Software

- It's a management software that Maintains all tailor shop activities with just one Web App. All the business operations can be analyzed and evaluated by this.
- They Can Easily Create Service And their related charge and other tools.
- This software is made with a Laravel backend, using HTML, CSS, JS, Livewire, Alpine JS For frontend development.
- Laravel queue For Sending Mail and Sms to the Client, I have used API for License And Support (feature) information that comes from another web app to support this app.
- This is a SAAS Product, which Means This One Interface Can be used By Many Clients, With only their Information without interfering with others information

Cleaning Company

- It's a Management software for Cleaning Company that has many type service like cleaning, moving, Handwork Service many more, all type of service have their different type of working time and service charge type.
- Those services are dynamic they can add many more.
- I have used HTML, CSS, JS, jquery, bootstrap, Livewire, and Laravel for Backend.
- I have used the Stripe Payment method to take payment from the client.
- Use Google Map API to calculate the distance between two places for moving services.

Use Laravel Queue for sending Mail to reduce User time.

- I have used Laravel Localization to To make this website in two languages two English and Deutsch
